

XIX IBERIAN PEPTIDE MEETING

KN	Keynote	40+5	min
IL	Invited Lecture	22+3	min
OT	Oral Talk	13+2	min
ST	Short Talk	7+1	min
CT	Company Talk	13+2	min

Wednesday, 26th

11:45

REGISTRATION

14:45

WELCOME REMARKS

15:00

KN1 Xavier Salvatella ICREA Research Professor

Learning from nature: designing glutamine-based single α -helices to inhibit protein-protein interactions

15:45

OT01 Paco Fernández-Trillo Universidade da Coruña

Delivery of Antimicrobial Peptides through Peptide-Based Carriers

ST01 Christine Cruz Oliveira Gulbenkian Institute for Molecular Medicine

Broad-spectrum antiviral peptide-porphyrin conjugates restrict Zika virus replication and mitigate disease in mice

ST02 Alba Ramil-Bouzas, CICA

Cationic self-assembling lipopeptides as non-viral gene delivery vectors in mesenchymal stem cells

ST03 Vera Neves Gulbenkian Institute for Molecular Medicine

PepH3-decorated nanoparticles for delivery of therapeutic peptides

CT1 Marisa Juanes TraffikGene

TraffikGene: A Versatile Platform for Nucleic Acid Delivery Based on Amphiphilic Peptide Carriers

Chair: Eugenio Vázquez

16:45

Coffee Break

17:15

OT02 Carles Mas-Moruno Universitat Politècnica de Catalunya

Multifunctional and dynamic peptide-based hydrogels

ST04 Cristina Montaner Institut Químic Sarrià

De novo designed peptide masks enable ligand binding activation with different stimuli

ST05 Patricia Sanmiguel Universidade de Santiago de Compostela

Selective recognition of three-way DNA junctions with designed α -helical peptides

ST06 Valeska Viereckt University of Marburg

Bioluminescence-based Singlet Oxygen Generation

ST07 Manuel Pérez-Pérez Universidade de Santiago de Compostela

Peptide-Coated Platinum Nanocages for Tumor Targeting

OT03 Ivo Martins Gulbenkian Institute for Molecular Medicine

Peptide-based inhibition of Zika virus

ST08 Alberto Muñoz Villoria Universidade de Santiago de Compostela

Toward tumor-targeted biorthogonal catalysis with a HER2 affibody

ST09 Bárbara Matos i3S

PSA-responsive self-assembling peptides for prostate cancer drug delivery

ST10 Carlos Cuadros-Higueras Instituto de Química Médica (IQM-CSIC)

Advances in cardiovascular deca-11 peptide analogues

OT04 Sónia Gonçalves Gulbenkian Institute for Molecular Medicine

Silver nanostar-anticancer peptide conjugates: a novel approach to enhance anticancer efficacy

Chair: Diego Núñez

19:00

WELCOME COCKTAIL

19:30

Thursday, 27th

9:00	KN2	Luc Brunsveld Eindhoven University of Technology <i>A quantitative understanding of PPI stabilization by molecular glues – a crucial role for peptides</i>	Chair: Ana Pina
9:45	OT05	Julian Bergueiro , Universidade de Santiago de Compostela <i>Peptide assembly through exo-helical interactions</i>	
	ST11	Joana Martins Laboratório Associado para a Química Verde <i>P-Sulfonatocalix[4]arene-based ratiometric arrays for peptide sensing</i>	
	ST12	Ion Turcan Universidade de Santiago de Compostela <i>Screening of peptide amphiphiles with autocatalytic self-assembly</i>	
	ST13	Diego Sánchez-Brunete Universidade de Santiago de Compostela <i>A peptide-based receptor for polyoxometalates</i>	
	ST14	Federica Souto-Trinei CICA - Centro Interdisciplinar de Química e Bioloxía <i>Self-assembling lipopeptides as phospholipid membrane mimics</i>	
	ST15	Pavel Zelenovskii CICECO-Aveiro Institute of Materials <i>Self-assembling two-dimensional peptide nanostructures with piezoelectric properties</i>	
10:45	Coffee Break and Posters		
11:45	IL1	Mohit Kumar University of Barcelona <i>Active vesicle as synthetic cell and their role in peptide/protein self-assembly</i>	
12:15	OT06	Roland Hellinger Medical University of Vienna <i>Structure inspired grafting to design novel T-lymphocyte migration modulator peptides</i>	
	ST16	Román Fernández López Universidade de Santiago de Compostela <i>Synthesis of 3-hydroxy-4-aminocyclohexanecarboxylic acid-based peptides</i>	
	ST17	Alicia Moreno-Ainse Center for Research in Biological Chemistry and Molecular Materials <i>The role of lysophosphatidic acid in cancer immune evasion</i>	
	ST18	Carmen González-González Universidade de Santiago de Compostela <i>Non-Aromatic Fluorescence in Zwitterionic Single α-Helical Peptides</i>	
	ST19	Carina Esteves UCIBIO <i>Peptide ionogels for artificial olfaction</i>	
	ST20	José María Martínez Parra Universidade de Santiago de Compostela <i>Exo-chirality of the α-helix in helical peptide assemblies</i>	
	OT07	Iván Sasselli CSIC-UPV/EHU <i>Converging experiments and computation for supramolecular peptide assemblies</i>	
13:30	Lunch		
15:00	KN3	Olalla Vázquez Marburg University <i>Peptides in Action! – unlocking their potential in chemical biology</i>	
	OT08	Ignacio Insua Universidade de Santiago de Compostela <i>Supramolecular peptide assemblies for structural and functional cell mimicking</i>	
	ST21	Jianing Li Imperial College London <i>Investigating how protecting groups affect physicochemical properties and purification of peptides</i>	
	ST22	Axel Sarmiento Universidade de Santiago de Compostela <i>DNA 3-way junction binding with Metal-stabilized collagen triple helices</i>	
	ST23	Zoe Manglano Artuñedo Autonomous University of Barcelona <i>A structure-based approach towards a new therapy for Parkinson's Disease</i>	
	ST24	Joana Calvário ITQB NOVA <i>Investigating Amino Acid Enrichments and Patterns in Phase-Separating Proteins</i>	
	ST25	Adrián Sánchez-Fernández Universidade de Santiago de Compostela <i>Modulating protein conformation and entanglement in compositionally designed deep eutectic solvents</i>	
16:45	Coffee Break and Posters		
17:45	IL2	Benjamin Oller ChemSynBio IQS Barcelona <i>How may peptides increase antibody tissue selectivity and brain transport?</i>	
18:15			
20:30	SOCIAL DINNER		

Chair: Ana Pina

Chair: Myriam Royo

Chair: Marta Planas

Friday, 28th

9:00	KN4	Annemieke Madder <i>Furan- and Triazolinedione-based Chemistries for Bio-orthogonal Protein Modification</i>	
9:45	CT2	Giorgio Marini CEM (Alenium – Qlabo) <i>Innovations in Sustainable Peptide Production</i>	
OT09	Maria Angeles Jimenez , IQF, CSIC	<i>Understanding protein interactions using solution NMR and a “divide-and-conquer” approach</i>	
ST26	Jordi Lamata Universidad de Girona	<i>Novel peptaibol derivatives as promising candidates to target the plant quarantine pathogen <i>Xylella fastidiosa</i></i>	
ST27	Jordi Pujols Universidad Autónoma de Barcelona	<i>Exploiting prion-like amyloid assemblies to produce functional nanomaterials</i>	
ST28	Ezequiel Silva-Nigenda University of Windsor	<i>Use of Computational modeling and Continuous-Flow Solid-Phase Peptide Synthesis for the design and synthesis of peptide ligands targeting HLA and Hsp90</i>	
OT10	Martin Calvelo Souto Universidad de Santiago de Compostela	<i>Influence of Lipid Composition on Amyloid Beta Aggregation</i>	
11:00		Coffee Break	
11:45	IL3	Paula Ferreira University of Minho <i>Supramolecular Peptide Hydrogels: Exploring the Role of Dehydroamino Acids</i>	
12:15	CT3	Valentina Stulberg Iris Biotech GmbH <i>Building with precision - innovative tools in peptide synthesis</i>	
ST29	Sebastián Jiménez Millán Centro de Física de Materiales (CSIC, UPV/EHU)	<i>Interaction of SARS-CoV-2 Fusion Peptides with Lipid Membranes</i>	
ST30	Álvaro de la Cruz CSIC - Institute of Medicinal Chemistry	<i>Targeting the Weak Spot of Hemagglutinin: Toward Broad-Spectrum Influenza Therapeutics</i>	
ST31	Carmen Bretón Beltrán Universidad de La Rioja	<i>Development of Non-Natural MUC1 Glycopeptide Cancer Vaccines</i>	
ST32	Fabián Suárez-Lestón Universidade de Santiago de Compostela	<i>Coarse-Grained Molecular Dynamics Simulations of Antimicrobial Peptides</i>	
ST33	Inés del Barrio , Institut de Química Avançada de Catalunya (IQAC-CSIC)	<i>Cyclic iodonium salts as self-activated tags for primary aliphatic amines</i>	
13:15		PRIZE CEREMONY AND CLOSING REMARKS	
13:30		Lunch	

Chair: Paula Gómez

Chair: Nuno Santos
